

MIGHTY EXPLORERS' SCAVENGER HUNT!

SOUTH DISCOVERY TRAIL

<p>Some dinosaurs swallowed rocks to grind up their food in their stomachs! Which South Trail dinosaur did this?</p>	<p>Some people used to think Parasaurolophus used its crest to breathe fire! What do scientists today think it was used for?</p>	<p>Dinosaurs lived a long time ago, but can you find 2 creatures that existed before the dinosaurs?</p>	<p>Dilophosaurus had 2 crests on its head that were likely for display! What colour do you think the crests were?</p>
<p>Instead of thumbs this dinosaur had sharp spikes on its hands! Which dinosaur is it?</p>	<p>Ants are small but mighty creatures! How long can some queen ants live?</p>	<p>This Alberta dinosaur has been found "mummified" with preserved soft tissue! Which dinosaur is it?</p>	<p>This plant has not changed since the time of the dinosaurs and is called a "living fossil!" Which plant is it?</p>
<p>Most coniferous trees keep their needles all winter long. What tree is an exception to this?</p>	<p>Female mosquitos are parasites that drink blood! What blood type do they prefer?</p>	<p>Albertosaurus was a fierce predator related to T. rex! Did it live before, after, or at the same time as T. rex?</p>	<p>Coelophysis is the most ancient dinosaur found in Jurassic Forest! Which time period did it live in?</p>
<p>Pteranodon flew over the Cretaceous seas hunting fish and squid! Did it have teeth?</p>	<p>What ancient creature is sometimes called the "Siberian Unicorn?"</p>	<p>This fish-eating dinosaur was likely able to swim! What does the name "Baryonyx" mean?</p>	<p>Not all fossils are bones! What is a coprolite?</p>

MIGHTY EXPLORERS' SCAVENGER HUNT!

NORTH DISCOVERY TRAIL

<p>Which dinosaur used armor and a heavy tail club to defend itself from predators?</p>	<p>Utahraptor was a fierce hunter! What weapon did it use to catch its prey?</p>	<p>Triceratops was an herbivore that lived in the Cretaceous! What does its name mean?</p>	<p>Stegosaurus had 2 pairs of spikes on its tail to protect itself! What are these spikes called?</p>
<p>Pachyrhinosaurus was common in Alberta! Which 2 dinosaurs found in Jurassic Forest is it closely related to?</p>	<p>Spiders have existed for millions of years! How many eggs can a female spider produce at one time?</p>	<p>Maiasaura was too heavy to sit on its nest! What did this dinosaur use to keep its eggs warm?</p>	<p>Archaeopteryx and Microraptor show characteristics of both birds and dinosaurs! Did they live in Alberta?</p>
<p>Therizinosaurus had the longest hand claws of any terrestrial animal known! How long were its claws?</p>	<p>Some dinosaurs have really long names! What does the name "Pachycephalosaurus" mean?</p>	<p>T. rex had tiny arms! What dinosaur had even smaller arms for its body size?</p>	<p>Spinosaurus and T. rex were both ferocious predators! Did these 2 dinosaurs compete for prey?</p>
<p>Apatosaurus was a huge sauropod that lived in North America! Did it live at the same time as T. rex?</p>	<p>Pteranodon flew the Late Cretaceous skies! Was it a dinosaur, a bird, or neither?</p>	<p>Since they evolved into birds, not all dinosaurs are extinct! What are 2 birds living in Jurassic Forest today?</p>	<p>Which dinosaur had the strongest bite force?</p>
